Dear Harold,

8-29-76

I am to be released in the morning. Everybody thinks I've made a speedy recovery, but they still haven't confirmed our reservations home. I hope we will leave here a week from today, which is Sept. 5, but Mary's father is trying to get her to stay til the 8th because of my operation. He's also been heard to proclaim lately that the younger generation doesn't have enough horsehead sense to diagnose an appendicitis attack.

I finished Presumed Guilty today. Howard several times cites ~~Frazier's~~ the Transcript of Frazier's Show Trial Testimony. Could you get me a copy of that?

The August 30 edition of Newsweek sold here has a story on "The FBI: 'They're in a panic'" which identifies John P. Dunphy as chief of the FBI's Exhibits Section and "a key assistant to John P. Mohr." He's apparently getting ready to squeal. Perhaps then I should note his deposition when I get back?
